Release Notes
wylerINSERT

Version	Release Date	Release Notes
2.6.9.311	**2026.06.23**	• Improved Detection for wylerCONNECT Rev. C
2.6.7.286	**2026.03.30**	• Fixed write value when the display unit is set to d°m's"
2.6.6.280	**2026.01.21**	• Fixing timing issues when writing data to the intended application • Fix for problems reading small values with scientific notation • In the unit xx° xx' xx", the signs are now assigned directly to each of the three individual values. This means that the sign is no longer lost in the case of leading zero values.
2.5.2.0	**2023.11.13**	• Fix Clinotronic S Bluetooth connection • Fix configuration window • Fix scattering dialog • Silent update of wylerCONNECT
2.5.1.0	**2022.09.26**	• **wylerSOFT Info Center Installer now integrated in wylerSPEC Setup Zip File and is not automatically installed anymore** • General bug fixes • If wylerCONNECT wireless device search is started, search via Bluetooth Legacy first and then via Bluetooth BLE • Updated translations
2.5.0.0	**2022.09.02**	• Upgraded wylerINSERT to 64 bit • User can set number of decimal places for measurement values to be printed in selected output application
2.4.0.0	**2022.05.19**	• BlueLEVEL II integration
2.3.2.0	**2021.11.19**	• wylerCONNECT or dongle can be plugged in after software start up and will be found by clicking Refresh button in Licence window
2.3.1.0	**2021.10.07**	• Bug fix in WyBus dll
2.3.0.0	**2021.08.30**	• Added language Chinese
2.2.2.0	**2021.07.02**	• Updated help • General bug fixes and GUI

		improvements
2.2.0.0	**2021.05.20**	• Improvements in stable angle calculation • Bug fix: language can be changed • Sampling time can be changed by user
2.1.11.0	**2021.04.23**	• General bug fixes and GUI corrections
2.1.10.0	**2021.04.07**	• Bug fixes in communication with devices • Device Management redesign • Updated help manual
2.0.5.0	**2021.02.12**	• Bug fixes in communication with devices • Modifications in ABOUT dialog
2.0.4.0	**2020.08.21**	• **Integration of wylerLEVEL, wylerLEVEL Frame, wylerCLINO and wylerCLINO Frame in wylerINSERT**
2.0.3.0	**2020.03.06**	• Fix in wylerABOUT: Scrollbar automatically visible if needed • Bug fix: LEVELMETER2000 and BlueMETER recognized by wylerINSERT
2.0.2.0	**2020.02.13**	• Bug fix in Installer. Old software version will be properly removed and replaced by the new one.
2.0.1.0	**2020.01.31**	• Bug fix in wylerABOUT: if Outlook is not installed, prompt message box to the user.
2.0.0.0	**2020.01.24**	• **From this version on O N L Y Windows 10 supported** • wylerCONNECT integration in wylerINSERT • wylerABOUT integration, for better debug purposes (including wylerLICENSE for license management) • Possibility to select output application for writing the measurement data of wylerINSERT
1.1.6.45	**2017.04.12**	• Direct access to BlueCLINO devices enabled
1.1.5.36	**2016.03.24**	• Bug where configuration was overwritten on program start fixed • Microsoft SQL CE added to installer
1.1.5.31	**2015.09.30**	• Bug where under certain conditions the angle was written incorrectly to the target program fixed • Crash under x64 during copy protection fixed

	• Added BlueCLINO-3D • Problem with communication via BlueTC fixed • Problem where reading angles from a BlueMETER-Sigma caused problems with the 3rd and 4th device fixed • Wynsert will now collect data from all devices and write the final values to the target application once all devices have a stable value • When a value overshoots the scatter limit all devices will be read again
	• Initial release
