

## Important Information from WYLER AG for Our Business Partners

Winterthur, Switzerland

March 30, 2020

Dear friends and business partners,

Despite having a solid order fulfillment position, the coronavirus pandemic has unfortunately forced us to reduce production capacity. Moreover, apart from the strict adherence to hygiene measures and physical distancing, we have taken additional important precautions.

Overview of the current measures:

1. As of Monday March 30, 2020, the entire operation will be divided into morning and afternoon shifts in order to further reduce the risk of infection to our employees. The resulting reduction in production may lead to minor delivery delays.
2. For other employees, the opportunity to work from home has been broadened.
3. We continue to be available by phone at: +41 52 233 66 66 or via email at: [wyl@wylag.com](mailto:wyl@wylag.com).
4. The company remains closed to visitors, save for exceptional cases.

These remain very turbulent times, and there continues to be great uncertainty around the world. It is important to us to protect the health of our employees through these measures, and to continue serving our business partners reliably. We thank you for your understanding.

We wish you, your families, and your staff all the best, and the best of health.

WYLER AG
