BlueLEVEL-2D App

WYLER is pleased to present the BlueLEVEL-2D App for Android users

To further enhance the flexibility of the proven WYLER BlueLEVEL-2D inclination measurement instrument, WYLER has developed the free BlueLEVEL-2D App for Android devices. This App facilitates the remote display of measurements.

It offers several functions, including:

- Numerical values along both the X and Y axes (image above).
- Display of measurement values as polar coordinates (front image), as a needle display, and as a spirit level.
- Units:
  mm/m, degrees (° / ´ / ´´), „/10", „/12"
- Switching between relative zero and absolute zero.

The integrated help function assists users in linking the App with the BlueLEVEL-2D.

System requirements:

- Phone or tablet with Android 3.0 or higher
- BlueLEVEL-2D with Bluetooth
- Functionality and range of functions depend on device used.
